SERVICES GROUP

***Specialist M&E***

# PTSG Specialist M&E

---

PTSG Specialist M&E are experts in the area of mechanical and electrical maintenance. Our comprehensive services range from an initial audit of needs, through to full project design implementation and maintenance covering specialist air conditioning, insurance inspections and training.

Our expertise encompasses all technical and commercial aspects of building mechanical and engineering services. We are experienced in delivering complex, multi-site projects in both the public and private sectors. Our services protect your investments and support differing operational needs to ensure a comfortable, safe and sustainable environment.

As a private limited company you can be assured of an attentive and personal service yet our bases across the UK enable us to undertake work in any location with 24-hour availability and the benefit of personal service and a single point of contact.

We have a commitment to understanding our customers and delivering the best value. Completing projects on time and on budget, via our robust and accredited procedures, is our only focus

## Insurance Inspections

PTSG Specialist M&E can provide comprehensive insurance inspections and reports. We can inspect your building from top to bottom and provide you with a customised report and digital photos of your property's condition. We will provide our recommendations for the restoration and / or ongoing maintenance of your property.

This proposal will outline the proper way to effectively and fully restore your building; what products are needed and why. Our proposal will also provide multiple service options to suit your budget and at the same time achieve your objectives.

We will inspect your property to identify any problem areas and provide our recommendations on how to address these issues using the highest quality, most cost-effective and environmentally sustainable products and techniques.

Our specialist maintenance, electrical testing and inspection offers unparalleled service ensuring you are compliant with current legislation, Health and Safety Laws and meet the conditions of your insurance policy.

## Training

PTSG Specialist M&E's experience in the field of specialist electrical and mechanical services means that we have a great deal of expertise we are able to pass on to your staff. Our training and development is delivered by engineering experts who are vastly experienced in the industry and the technical content is high quality, relevant and up to date.

We have a proven track record of working in industry developing training solutions that are of sustained value and benefit across many business sectors. We develop training strategies and solutions through analysis of training needs, excellent course design and successful implementation.

A photograph of two men in a construction setting. The man on the left is wearing a blue hard hat, a white shirt, a blue tie, and a dark suit jacket. The man on the right is wearing a white hard hat and a blue shirt. They are both looking intently at a large set of blueprints held by the man on the left. The background shows a wooden framework of a building under construction.

## Consultancy

Approximately 1000 incidents involving electric shock or burns at work are reported to Health & Safety each year. Shocks from faulty equipment can lead to falls from access equipment, ladders etc. Poorly maintained electrical installations or faulty appliances can also lead to fires which can of course in turn lead to serious injury or worse.

Most accidents however can be avoided. It is therefore vitally important that your processes, procedures and training are fully up to date in order to protect your employees and your business.

PTSG Specialist M&E's vast experience allows us to offer electrical and mechanical consultancy to ensure that your processes and procedures comply with all of the latest legislation.
