# Her Majesty's Government

PTSG has, for many years, delivered specialist services for Her Majesty's Government – across many different disciplines, for a range of departments. It's a sustainable relationship which has developed over the years so that PTSG is now viewed as a provider that is trusted to deliver in all areas of facilities management.

- PTSG has recently renewed a contract with the Department for Work and Pensions (DWP), taking the working relationship into its 14th year. Engineers from PTSG Access and Safety Ltd will test fall arrest equipment at sites throughout the UK. The work will be carried out in accordance with SFG20 – the definitive standard for planned maintenance. It enables facilities managers, building owners, contractors and consultants to stay compliant.

Developed by the Building and Engineering Services Association, SFG20 provides consultants, contractors, building owners and FM managers a single version of the truth when it comes to maintenance requirements for buildings.

First developed as SMG90 in 1990, the standard has been revised and updated on an ongoing basis, evolving from the original set of five published volumes, to a CD-ROM, before transitioning to an online service in 2012.

**'PTSG is a proud partner of Her Majesty's Government, delivering a wide range of specialist services to ensure sites throughout the country are fully operational and buildings remain safe for all users'**

# Her Majesty's Government

- PTSG has recently been re-awarded another contract to deliver a variety of specialist services for the Department of Business, Energy and Industrial Strategy, and Land Registry.

The contract will see engineers from PTSG attend sites for Government departments for the third consecutive year. The work consists of the testing of lightning protection systems, fall arrest equipment and electrical wiring and systems.

This kind of bundled services provision is becoming increasingly popular amongst PTSG's customers and supply chain partners. It ensures a single point of contact, simplifies work flow and also offers the possibility of cost savings.

- The Home Office is another area of Her Majesty's Government to form an agreement with PTSG for the provision of specialist services. Engineers from PTSG Electrical Services Ltd will deliver portable appliance testing (PAT) and electrical installation condition reporting (EICR) at over 200 sites nationwide for the Home Office and the Ministry of Justice.

- Her Majesty's Revenue and Customs (HMRC) recently contracted PTSG to deliver a range of specialist services at 16 sites in total. The contract will see engineers from PTSG Access & Safety Ltd and PTSG Electrical Services Ltd delivering the testing of lightning protection systems, fall arrest equipment and cradles allowing access to building façades.

Headquartered at 100 Parliament Square, Westminster and employing around 56,000 full time staff, HMRC (Her Majesty's Revenue and Customs) is a non-ministerial department of the UK Government responsible for the collection of taxes, the payment of some forms of state support and the administration of other regulatory regimes including the national minimum wage.

PTSG is a proud partner of Her Majesty's Government, delivering a wide range of specialist services to ensure sites throughout the country are fully operational and buildings remain safe for all users.
