PTSG and Amazon

Amazon.com, formed by Jeff Bezos, has been referred to as 'one of the most influential economic and cultural forces in the world'. In 2018, its two-day delivery services, Amazon Prime, surpassed 100 million subscribers worldwide. By the end of 2021 Amazon will employ 55,000 people across the UK.

PTSG has provided a variety of specialist services for Amazon on a number of occasions. In July 2021, PTSG Electrical Services Ltd was contracted to install a brand-new lightning protection system at Amazon's fulfilment centres in Bracknell, Berkshire and Wakefield, West Yorkshire.

Amazon has a number of warehouses, or fulfilment centres, strategically placed throughout the UK to cater for its ever-increasing number of customers. Each of these centres of operation is vast and employs its own workforce from operations managers to engineers, HR and IT roles to employees handling customer orders.

PTSG and Amazon

PTSG has provided a variety of specialist services for Amazon on a number of occasions. In July 2021, PTSG Electrical Services Ltd was contracted to install a brand-new lightning protection system at Amazon's fulfilment centres in Bracknell, Berkshire and Wakefield, West Yorkshire.

In May 2021, engineers from PTSG Electrical Services Ltd delivered a brand-new lightning protection system at the new delivery station, ensuring the structure and all staff remain safe in the event of an electrical storm.

At the end of 2020, engineers from PTSG Fire Solutions Ltd installed a new fire alarm system at Amazon's Swindon fulfilment centre.

The work delivered for Amazon illustrates PTSG's multiple services capability. The relationship between the two began with the Group being contracted to deliver a single specialist fire solution for Amazon's Swindon fulfilment centre.

However, satisfaction with the speed of mobilisation and quality of workmanship, plus an awareness of the Group's multiple capabilities, has meant that PTSG has been repeatedly contracted for specialist electrical services. This could easily be extended to other services from PTSG Fire Solutions Ltd and PTSG Electrical Services Ltd, as well as those delivered by PTSG Access & Safety Ltd, PTSG Building Access Specialists Ltd and PTSG Water Treatment Ltd.
